1. This memorandum responds to your request for OPBC's external secure line requirements. OPBC's needs stem from our Capabilities Programming and Budget (CPB) computer development activities and the Data Support Group's activities on behalf of the IC Staff. The following table summarizes these needs:

Device	Connected To	Speed	FY 1983	FY 1984	FY 1985	FY 1987	FY 1988
Word Processor (WP)*	CIA	2.4KB	2	0	0	0	0
CPB WP	NSA	2.4KB	8	5	5	UNK	UNK
CPB Printer	NSA	9.6KB	1	0	0	0	0
Color Terminal	NSA/CIA	9.6KB	0	0	1	0	0
Total Line Capacity (KB)			33.6	12.0	21.6		

*Existing NBI equipment

2. I believe we should also have OC assess our communication needs for internally netting both existing and projected WP devices. Clearly, the ICS has a considerable investment in this technology that has the potential for further automating our offices with services like electronic mail, document exchange, etc. For planning purposes, we should have OC outline the costs for developing such an internal [ ] office automation network.
